Working Together for a Secure Iraq

**16 - 18 April**

**2018**

## The Vision of the Conference:

The Third National Conference on Chemical, Biological, Radiological and Nuclear Safety and Security will provide a forum for those who are dealing with chemical, biological, radiological and nuclear safety and security issues to communicate with the academic, industrial and governmental security sectors to discuss the national efforts for reducing the risks of the hazardous materials and to find the best ways to coordinate between the institutions

The conference will focus on the efforts of Iraqi universities, other ministries of the state and the security authorities to confront chemical, biological, radiological and nuclear threats, as well as identifying these threats and carrying on the security practices required to maintain safety and chemical, biological, radiological and nuclear safety.

## Conference Objectives :

- 1 Providing a forum for chemical, biological, radiological and nuclear security stakeholders to discuss chemical, biological, radiological and nuclear security initiatives, successes, challenges and next steps to address the other security gaps.
- 2 . Identifying the available opportunities for strengthening the existing rules and regulations to secure chemical, biological, radiological, nuclear, know-how, sensitive information and infrastructures that could be misused. .

3 Understanding the weakness points in universities, private and governmental sectors to start coordination among them to reduce the risks of chemical, biological, radiological and nuclear material.

4 Building national capacities to develop standardize and apply best chemical, biological, radiological and nuclear security practices related to the production, storage and transportation of chemical, biological, radiological and nuclear materials as well as waste treatment issues.

5 Building and developing well trained national capacities able to use the modern and advanced equipment for accurate detection of the chemical, biological, radiological and nuclear materials at border ports and inside Iraq to prevent any expected misuse.
