## The Vision of the Conference:

The Fourth National Conference on CBRN Safety and Security will provide a forum for those who are dealing with chemical, biological, radiological and nuclear safety and security issues to communicate with the academic, industrial and governmental security sectors to discuss the national efforts for reducing the risks of the hazardous materials and to find the best ways to coordinate between the institutions. The conference will focus on the efforts of Iraqi universities, other ministries of the state and the security authorities to confront chemical, biological, radiological and nuclear threats, as well as identifying these threats and carrying on the security practices required to maintain safety and chemical, biological, radiological and nuclear safety.

## Conference Objectives:

1. Spreading the culture of chemical, biological, radiological and nuclear safety and security, make it a societal culture and emphasize Iraqi universities to play this important role.
2. Strengthen the Iraqi national capabilities of coordination, prevention, mitigation, and response to effectively counter the proliferation, acquisition, development, or use of CBRN weapons.
3. To ensure a comprehensive approach to those objectives and make effective contribution in the development of Iraq's CBRN security infrastructure.

4. Developing whole of governmental, collaborative, and sustainable strategies to confront ongoing and emerging CBRN threats.
5. Developing strategic policy frameworks, operational practices, and response forces to strengthen its ability to protect the citizens and those who visit, live, study, or work in our country.

## Conference Themes:

- Chemical Safety and Security
- Biological Safety and Security
- Radiological Safety and Security
- Nuclear Safety and Security

## The Conference in Brief:

The achieved successes in the previous National CBRN Safety and Security Coordination Conferences in 2017 and 2018 pushed the organizers to improve the conference contents and format to be more inclusive, interactive, inter-connected, and related to security issues.

The 4th conference will convene Iraqi, global, public, and private CBRN security experts to discuss, debate, and raise the awareness of Iraqi CBRN security realities regarding:

- Ongoing and emerging threats
- Strategic frameworks
- Supply chain management
- Capacity building and inter-disciplinary trainings
- Border security and law enforcement priorities
- Response and coordination capabilities

Following the first two days of speakers lectures, presentations, working groups, and panel discussions, participants will gather on the closing day of the conference to participate in highly interactive or "kinetic" activities such as a real-world simulation, field exercise, training on equipment and demonstrations that will be a culmination of the week's proceedings and bring reality to CBRN security challenges and threats

## Important dates:

- January 31, 2019 : Registration end.
- January 31, 2019 : Deadline for abstract submission.
- March 15, 2019 : Submission deadline for the final version of the Papers .
